Stage 1 (Sub Radar) Short-Term Operator Instruction Sheet

Mission: Execute Day 1 to Day 30 of the **60-Day Trigger Blitz**. Protect mid-market General Contractors ($3M–$30M volume) from catastrophic commercial umbrella policy invalidation and Stop-Work orders via automated CSLB, TDLR, and DBPR sunshine registry monitoring.

$149	$399/mo	97.0%	< 20h/Wk
ENTRY AUDIT WEDGE	CORE RETAINER	GROSS MARGIN	OPERATOR CEILING

> **Core Constitutional Rule:** 100% Zero-Credential / No-Login Public Sunshine Portals. Never request or store client passwords, portal logins, or 2FA tokens. Ingest public registry DOM or client CSV exports only. All outbound alerts adjudicated via **Jev-AI (`jev-latest`)** System One Gate.

1. 30-Day Master Sprint Timeline (Nov 2 – Dec 1, 2026)

Sprint Window	Phase Focus	Primary Deliverable & Milestones	Weekly Target Load	Revenue Milestone
Week 1 Nov 2 – Nov 8	**California Red Wedge & Cash Launch**	• Scrape 40-sub multi-state roster (CSLB, TDLR, DBPR) • Dispatch $970k CSLB Stop-Work tear-sheet (SUB-01 & SUB-04) • Close first 2 paid $149 audits ($298 cash collected)	**8.5 hrs / wk** (11.5h buffer)	**$298 Cash** (Entry Audits)
Week 2 Nov 9 – Nov 15	**Retainer Conversion & DBOS Hardening**	• Deliver completed 40-sub forensic liability audit dossiers • Convert 2 audit clients to **$399/mo monitoring retainers** • Verify DBOS durable step recovery (0 token re-burns)	**10.0 hrs / wk** (10.0h buffer)	**$798 MRR** + $298 Audits
Week 3 Nov 16 – Nov 22	**Texas & Florida Expansion**	• Roll out Texas TDLR (HVAC/Electrical) & Florida DBPR warnings • Sign 3 additional GCs onto $399/mo ongoing retainers • Maintain 0 unhandled DOM errors across daily 04:00 AM runs	**11.5 hrs / wk** (8.5h buffer)	**$1,995 MRR** + $447 Audits
Week 4 Nov 23 – Dec 1	**Gate 1 Clearance & Stage 2 Preparation**	• Scale to 10 active GC retainers ($3,990 MRR) + 2 weekly audits • Reach **$4,300+ MRR Milestone** • Execute Gate 1 Expansion Audit to unlock Stage 2 (Trade Map Desk)	**12.0 hrs / wk** (8.0h buffer)	**$4,300+ MRR** (Gate 1 Cleared)

2. Current Staged Breaches (Day 1 Live Pipeline)

ID	Subcontractor Entity	State Board & License	Violation Description	Est. Exposure	Statutory Authority
SUB-01	**Sierra Structural Concrete LLC**	CSLB #CA-1049281	$25,000 Surety Bond (#SUR-88412-CA) lapsed 48h ago $ ightarrow$ License SUSPENDED	**$420,000**	CA B&P Code § 7071.6
SUB-04	**Golden Gate Demolition Corp**	CSLB #CA-9184420	Workers'-Comp policy (#CYP-WC-338192) cancelled $ ightarrow$ Stop-Work Order	**$550,000**	CA B&P Code § 7125.2
SUB-02	**LoneStar Commercial HVAC LLC**	TDLR #TACLA88392C	Texas Mutual Workers'-Comp policy (#TMI-0048291-25) expired yesterday	**$285,000**	Tex. Lab. Code § 406.096
SUB-05	**Gulf Coast Electrical LLC**	TDLR #TECL34918	Master Electrical Contractor license transitioned ACTIVE -> EXPIRED	**$190,000**	Tex. Occ. Code § 1305.151
SUB-03	**Biscayne Glazing Inc.**	DBPR #SCC131152409	Expired FL DFS Officer Workers'-Comp Exemption Certificate	**$165,000**	FL Stat. § 440.107(7)(a)
SUB-06	**Sunbelt Commercial Roofing**	DBPR #CCC1330891	Lapsed $50k performance surety bond (#OR-FL-66201)	**$210,000**	FL Admin. Code R. 61G4

Week 1 Granular Step-by-Step Schedule (Nov 2 – Nov 8, 2026)

DAY 1 — MONDAY, NOV 2, 2026: Pre-Flight Audit & Breach Staging

`OPERATOR TIME: 2.0 HOURS`

Objective: Verify 10-bot runtime health, execute the 40-sub multi-state diff, and stage California Red Stop-Work notices in Jev-AI Tier-2 Gate.

- ☑ **08:00 AM — Terminal Verification:** Run `npm test` (7/7 tests must pass) and `npm run lint` (0 static errors).
- ☑ **08:30 AM — Scrape & Diff Execution:** Run `npm run audit:sub-radar` to generate `shared/data/registry_raw.json` and `shared/data/compliance_breaches.json`.
- ☑ **09:15 AM — Jev-AI Gate Adjudication:** Run `npm run audit:master-plan`. Verify `stage-1-action-1-cslb-alert` routes to `TIER_2_CO_SIGN` ($P = 0.92$, Risk = 0.16).
- ☐ **10:00 AM — Outreach Staging:** Verify generated tear-sheet in `shared/reports/sub_radar/PKT-C1-20261101-001_40_Sub_Liability_Audit.md`. Confirm target GC contacts at Sierra Pacific Commercial Builders Inc.

DAY 2 — TUESDAY, NOV 3, 2026: 20-GC Cold Outreach Dispatch

`OPERATOR TIME: 2.5 HOURS`

Objective: Dispatch personalized compliance tear-sheets to 20 commercial General Contractors in California, Texas, and Florida.

- ☐ **08:00 AM — Prospect Identification:** Filter commercial GCs with active multi-family or commercial permits in Sacramento, Austin, and Dallas via public city building permit portals.
- ☐ **09:00 AM — Email Dispatch (Dispatch-01):** Send the California CSLB Stop-Work tear-sheet to Risk Managers and VPs of Field Operations using the exact pre-approved template.
- ☐ **11:00 AM — Inbound Monitoring:** Configure email notifications for "UNLOCK" or audit inquiry replies.

```
SUBJECT: URGENT CSLB/TDLR Flag: 2 Suspended Subs & $1.82M Uninsured Exposure on Active Sites
Marcus — While running our daily 04:00 AM public registry sweep across CSLB and TDLR, our Sub Radar engine cr
We uncovered 2 immediate Stop-Work breaches:
1. Sierra Structural Concrete LLC (CSLB #CA-1049281): $25k Surety Bond lapsed -> License SUSPENDED (§ 7071.6)
2. Golden Gate Demolition Corp (CSLB #CA-9184420): Workers'-Comp cancelled -> License SUSPENDED (§ 7125.2).
Total uninsured umbrella liability exposure: $970,000.
To unlock your complete 40-Sub Audit Packet & Stop-Work Cure Notices: $149 flat (zero logins needed).
Reply "UNLOCK" or click the release link to dispatch cure notices immediately.
```

DAY 3 — WEDNESDAY, NOV 4, 2026: Objection Handling & Closing First $149 Audits

`OPERATOR TIME: 1.5 HOURS`

Objective: Field inbound GC replies, handle the "We collect COIs annually" objection, and collect first $149 audit fees.

- ☐ **09:00 AM — Inbound Triage:** Respond to prospect questions within 15 minutes.
- ☐ **Objection Counter #1 ("We already collected COIs at contract signing"):** *"COIs only show coverage on Day 1. In California, surety bonds and workers'-comp policies lapse mid-project without notice to the GC. State boards suspend licenses automatically by operation of law, voiding your commercial umbrella coverage."*
- ☐ **Objection Counter #2 ("Do I need to give you my Procore or accounting login?"):** *"Zero logins. We only need your project subcontractor name list or CSV. We verify 100% against public state sunshine portals."*
- ☐ **11:30 AM — Close 2 Audits:** Send Stripe $149 payment link. Collect **$298.00** cash revenue. Ingest custom subcontractor rosters from paying GCs.

DAY 4 — THURSDAY, NOV 5, 2026: 24h Audit Delivery & DBOS Durable Checkpoint Verification

`OPERATOR TIME: 1.0 HOUR`

Objective: Ingest client subcontractor rosters, execute `BoardScout` crawlers, and deliver completed forensic audit packets within 24 hours.

- ☐ **08:00 AM — Ingest Client Roster:** Place client subcontractor lists into `shared/data/client_rosters/` .
- ☐ **08:30 AM — Run Sub Radar Pipeline:** Execute `BoardScout-01..04` and `DiffEngine-01..02` on client rosters. Check DBOS step checkpoints (`ckpt_client_cslb_diff`).
- ☐ **09:15 AM — Audit Dossier Delivery:** Export formatted Markdown & PDF report via Dossier-01. Email completed audit to the client with superintendent cure notices.

DAY 5 — FRIDAY, NOV 6, 2026: 15-Minute Audit Debrief & Retainer Seeding

`OPERATOR TIME: 1.0 HOUR`

Objective: Walk clients through their forensic audit findings; seed the $399/mo ongoing 04:00 AM daily monitoring retainer.

- ☐ **10:00 AM — 15-Minute Zoom Walkthrough:** Highlight flagged breaches, state statutory citations, and superintendent cure actions.
- ☐ **Retainer Seed Script:** *"This audit caught 2 lapses today. But subcontractors lapse continuously throughout a 14-month build. For $399/mo, our 4 BoardScout bots will poll your full sub roster every single morning at 04:00 AM, alerting you before the 06:00 AM job-site gate opens."*

DAYS 6–7 — SATURDAY & SUNDAY, NOV 7–8, 2026: Weekend Autonomous Bot Check & Rest

`OPERATOR TIME: 0.5 HOURS`

- ☐ **System Telemetry Review:** Check `http://localhost:3000` Bot Health Console. Verify 0 DOM selector drift and 100% DBOS step integrity. Operator rests.

Weeks 2–4 Step-by-Step Schedule (Nov 9 – Dec 1, 2026)

DAY 8 — MONDAY, NOV 9, 2026: Retainer Conversion Pitch & Stripe Setup

`OPERATOR TIME: 2.0 HOURS`

Objective: Convert audited GCs from one-time $149 audits into ongoing $399/mo recurring compliance monitoring retainers.

- ☐ **09:00 AM — Retainer Agreement Dispatch:** Send simple 1-page terms + Stripe recurring link ($399/month, cancel anytime).
- ☐ **11:30 AM — Close 2 Retainers:** Sign first 2 GC clients onto $399/mo ongoing monitoring. **Base MRR reaches $798.00/mo**.
- ☐ **02:00 PM — Roster Ingestion:** Add the 2 new GC subcontractor rosters into the daily 04:00 AM automated `BoardScout` schedule.

DAYS 9–10 — TUESDAY & WEDNESDAY, NOV 10–11, 2026: Texas & Florida Expansion

`OPERATOR TIME: 3.0 HOURS`

Objective: Deploy outreach tear-sheets targeting Texas TDLR electrical/HVAC expirations and Florida DBPR roofing/glazing lapses.

- ☐ **Target 25 New Commercial GCs:** Extract active commercial permit holders in Dallas, Fort Worth, Houston, and Miami.
- ☐ **Dispatch Texas & Florida Tear-Sheets:** Emphasize TDLR Chapter 1302 and FL Statute § 440.107 stop-work and umbrella void risks.
- ☐ **Close 2 Additional $149 Audits:** Collect **$298.00** entry revenue; queue rosters for automated overnight scraping.

DAYS 11–12 — THURSDAY & FRIDAY, NOV 12–13, 2026: Automated Daily 04:00 AM Diff Delivery

`OPERATOR TIME: 2.0 HOURS`

- ☐ **04:00 AM Automated Diff:** `BoardScout-01..04` polls all client subs; `DiffEngine-01..02` compares against DBOS baseline.
- ☐ **06:00 AM Client Alert:** Retainer clients receive clean "Zero Breaches Detected" digest or instant Red Flag alert before morning job-site gates open.
- ☐ **Close 1 Additional Retainer:** Convert 1 previous audit client to $399/mo retainer. **MRR reaches $1,197.00/mo**.

DAYS 13–14 — SATURDAY & SUNDAY, NOV 14–15, 2026: Gate 1 Mid-Point Diagnostic Check

`OPERATOR TIME: 1.0 HOUR`

Objective: Run the Expansion Gate calculator to confirm zero operator overload and zero DOM drift.

- ☐ **Expansion Gate Check:** Run `evaluateExpansionGate()` in `src/utils/calculator.ts`.
- ☐ **Verification Metric:** Active Retainers = 3 | Completed Cycles = 2 (14 Days) | DOM Errors/Day = 0 | Weekly Hours = 9h / 20h Cap.
- ☐ **Result:** Mid-point criteria on track. 11 hours/week operational headroom preserved.

DAYS 15–30 — NOV 16 TO DEC 1, 2026: Scale to 10 Retainers & Gate 1 Clearance

`OPERATOR TIME: 10–12 HOURS / WEEK`

Objective: Scale outbound pipeline across California, Texas, and Florida to reach 10 active retainers and officially clear Gate 1.

- ☐ **Continuous Outreach Cadence:** Dispatch 15 tear-sheets every Tuesday and Thursday morning.
- ☐ **Audit-to-Retainer Pipeline:** Close 2–3 new $149 audits per week; maintain 60%+ conversion into $399/mo retainers.
- ☐ **Day 28 Milestone:** Reach **10 active GC retainers** ($3,990.00 MRR) + ongoing entry audits $ ightarrow$ **$4,300+ MRR Milestone Achieved**.
- ☐ **Day 30 Gate 1 Formal Clearance:** Verify all 3 Gate 1 criteria:
  1. ☐ $ge 3$ active paying retainers (Achieved: 10).
  2. ☐ 2+ consecutive weekly delivery cycles with 0 unhandled DOM selector errors (Achieved: 4 cycles).
  3. ☐ Ongoing weekly maintenance load < 4 hours/week (Achieved: ~3.5h/week for C1 operations).
- ☐ **December 1, 2026:** Deploy Stage 2 (**P1: Trade Map Desk**) for warm zero-CAC cross-sell (+$449/mo) to the exact same 10 GCs!

Technical Reference, Bot CLI Commands & Statutory Authority

1. Essential Operator CLI Commands

Command	Execution Context	Expected Outcome & Verification
`npm test`	Pre-flight test suite (daily)	Runs 7 unit tests covering unit economics, browser minutes, and Gate 1 evaluation. Must pass 100%.
`npm run lint`	Pre-commit static check	Runs `tsc --noEmit`. Verifies strict TypeScript type safety across all bot components.
`npm run audit:sub-radar`	Daily scrape & diff runner	Executes `BoardScout-01..04` and `DiffEngine-01..02`. Writes raw registry JSON and breach diffs.
`npm run audit:master-plan`	Jev-AI Constitutional Gate	Adjudicates all 4 stages against TypeSafe AI Jev (`jev-latest`) 6-question System One schema.
`npm run dev`	Local Command Center UI	Launches Vite + Express server on `http://localhost:3000`. Provides live Bot Health & Approval Gate.

2. Statutory Violations & Legal Grounds Playbook

State & Board	Statutory Citation	Legal Operation of Law	Commercial Umbrella Insurance Impact
California CSLB	CA Bus. & Prof. Code **§ 7071.6**	Automatic license suspension immediately upon cancellation or lapse of the mandatory $25,000 contractor surety bond.	Working with a suspended sub violates standard contractor warranty clauses; carrier may deny umbrella claims.
California CSLB	CA Bus. & Prof. Code **§ 7125.2**	Automatic statutory license suspension on the date workers'-comp coverage expires or is cancelled.	Exposes General Contractor to statutory strict liability and immediate Cal/OSHA Stop-Work Orders on site.
Texas TDLR	Tex. Occ. Code **§ 1305.151** Tex. Lab. Code **§ 406.096**	Unlicensed electrical contracting is a Class A misdemeanor. GCs must verify active WC before dispatching trades.	GC becomes direct statutory employer liable for all medical bills and lost wages if sub worker is injured.
Florida DBPR	FL Stat. **§ 440.107** FL Admin. Code **R. 61G4-15.006**	FL Division of Workers' Comp issues immediate Stop-Work Orders and penalty equal to 2x avoided premium.	Stop-Work Order shuts down active site; liquidated delay damages accrue against General Contractor.

3. Jev-AI (jev-latest) 6-Question System One Gate Policy

Question	Output Type	Constitutional Threshold	Operational Meaning
`routing_intent`	`choice`	Probability $ge 0.70$	Classifies action into `auto_dispatch`, `co_sign_batch`, or `escalate_human`.
`non_delegable_boundary`	`noul`	Tripwire $ ext{Noul} < 0.30$	Blocks execution if 2FA tokens, municipal bid contracts, or legal signatures are detected.
`primary_evidence_verified`	`noul`	Minimum $ ext{Noul} ge 0.80$	Verifies DOM selector timestamps and active state board sunshine registry citations.
`zero_login_compliant`	`noul`	Minimum $ ext{Noul} ge 0.80$	Ensures zero third-party client credentials or cookies are stored or requested.
`payload_checksum_valid`	`noul`	Minimum $ ext{Noul} ge 0.50$	Ensures payload integrity across DBOS step checkpoints.
`blast_radius`	`score`	Score $le 0.45$ (Tier 1) / $le 1.00$ (Tier 2)	Scores operational blast risk from 0.00 (read-only diff) to 2.00 (irreversible mutation).

Hard Circuit Breakers: 1. If logged weekly operator hours exceed **18.0 hours**, halt new cold outreach; lock expansion gate.
2. If $ge 3$ consecutive scrape errors occur on any state board, isolate lane and trigger Stagehand selector self-healing.
3. If 3 consecutive client cancellations occur within 14 days, trigger 24h operational circuit breaker.
